CAREER OBJECTIVE

Throughout my 7-year-plus career as a software developer, I have focused on developing and enhancing scalable and well-documented code. I enjoy working collaboratively with the productivity, objectives and targets aimed at the achievements of the company's short and long-term goals.

EDUCATION

B.E in Electronics Engineering,

RCOEM, Nagpur University

2013 - 2017.

TECHNICAL SKILLS

Operating Systems: Linux, Unix, Windows

Programming Languages: Perl, shell, Python, Java.

Databases: MySQL, Oracle DB, Sybase DB, DB2.

Methodology: DevOps, Agile

Tools: Visual code studio, IntelliJ, IBM Scheduler,

DBeaver for SQL.

WORK EXPERIENCE

Infosys – Technology Analyst (Chennai 2017 – Feb 2022)

- Remediating the programs in perl, shell, python to get it compatible with new Linux platform (eg. FTP, SFTP, mailx, cron scheduler).
- Troubleshooting/debugging and Migration of executables written in C, Embedded C and Informix 4GL from Unix to Linux platform
- Worked on Stored Procedures by granting the permissions and executing the procedures.
- Worked on DB2 and Informix databases to pull data records using DML and DDL commands.
- Manipulating and updating the queries to get the resultant data records for testing purposes.
- Providing enhanced support after migrating the applications to Production Environment.

Optum Global Solutions, UHG. – Software Engineer (Gurugram Feb 2022 – Current year)

- Developed and enhanced multiple client profiles based on Perl, shell, python and Java programs to perform various rules on client provided input data in text, delimited, excel, HIPPA format files and load them to end system.
- Worked closely with system analysts and operations team to perform unit/integration testing of profiles.
- Developed multiple automated scripts to create alert, apply rules and generate automated reports.
- Handled an end-to-end project to migrate database from Sybase DB or MySQL DB.
- Migrated multiple servers from lower version to higher version (e.g. RHEL7 to RHEL9), ensuring minimal downtime and data loss
- Worked closely with the Operations team to ensure efficient deployment and monitoring of applications

Projects and Learning

- Currently pursuing a Professional certification in AL and ML from E&ICT Academy IIT Guwahati (Simplilearn platform)
- Gaining hands on experience in machine learning, Deep learning, NLP and computer vision using python, TensorFlow and other cutting-edge tools.
- Python libraries learned– Pandas, NumPy, scikit learn, Stats model, SciPy, matplotlib, seaborn
- Worked on below projects
 1. Employee turnover analysis:
Perform data quality check, understand what factors contributed most to employee turnover by EDA, perform clustering of Employees who left based on their satisfaction and evaluation, perform k-fold cross-validation model training and evaluate performance, Identify the best model and justify the evaluation metrics used.
Suggest various retention strategies for targeted employees.
 2. Analyse the Clothing company's sales data for every quarter across countries, and state by state and help the company make data-driven decisions for the coming year.
